# Products and Services

## Light Rail & Streetcar

The market leader – 19 cities in North America have ordered **more than 2000 Siemens Mobility light rail and streetcar vehicles**; one out of every three light rail vehicles in North America is a Siemens Mobility vehicle.

## Locomotives

Electric and diesel-electric locomotives for the U.S. will power **efficient, reliable and sustainable passenger rail service** across the country.

## Passenger Coaches

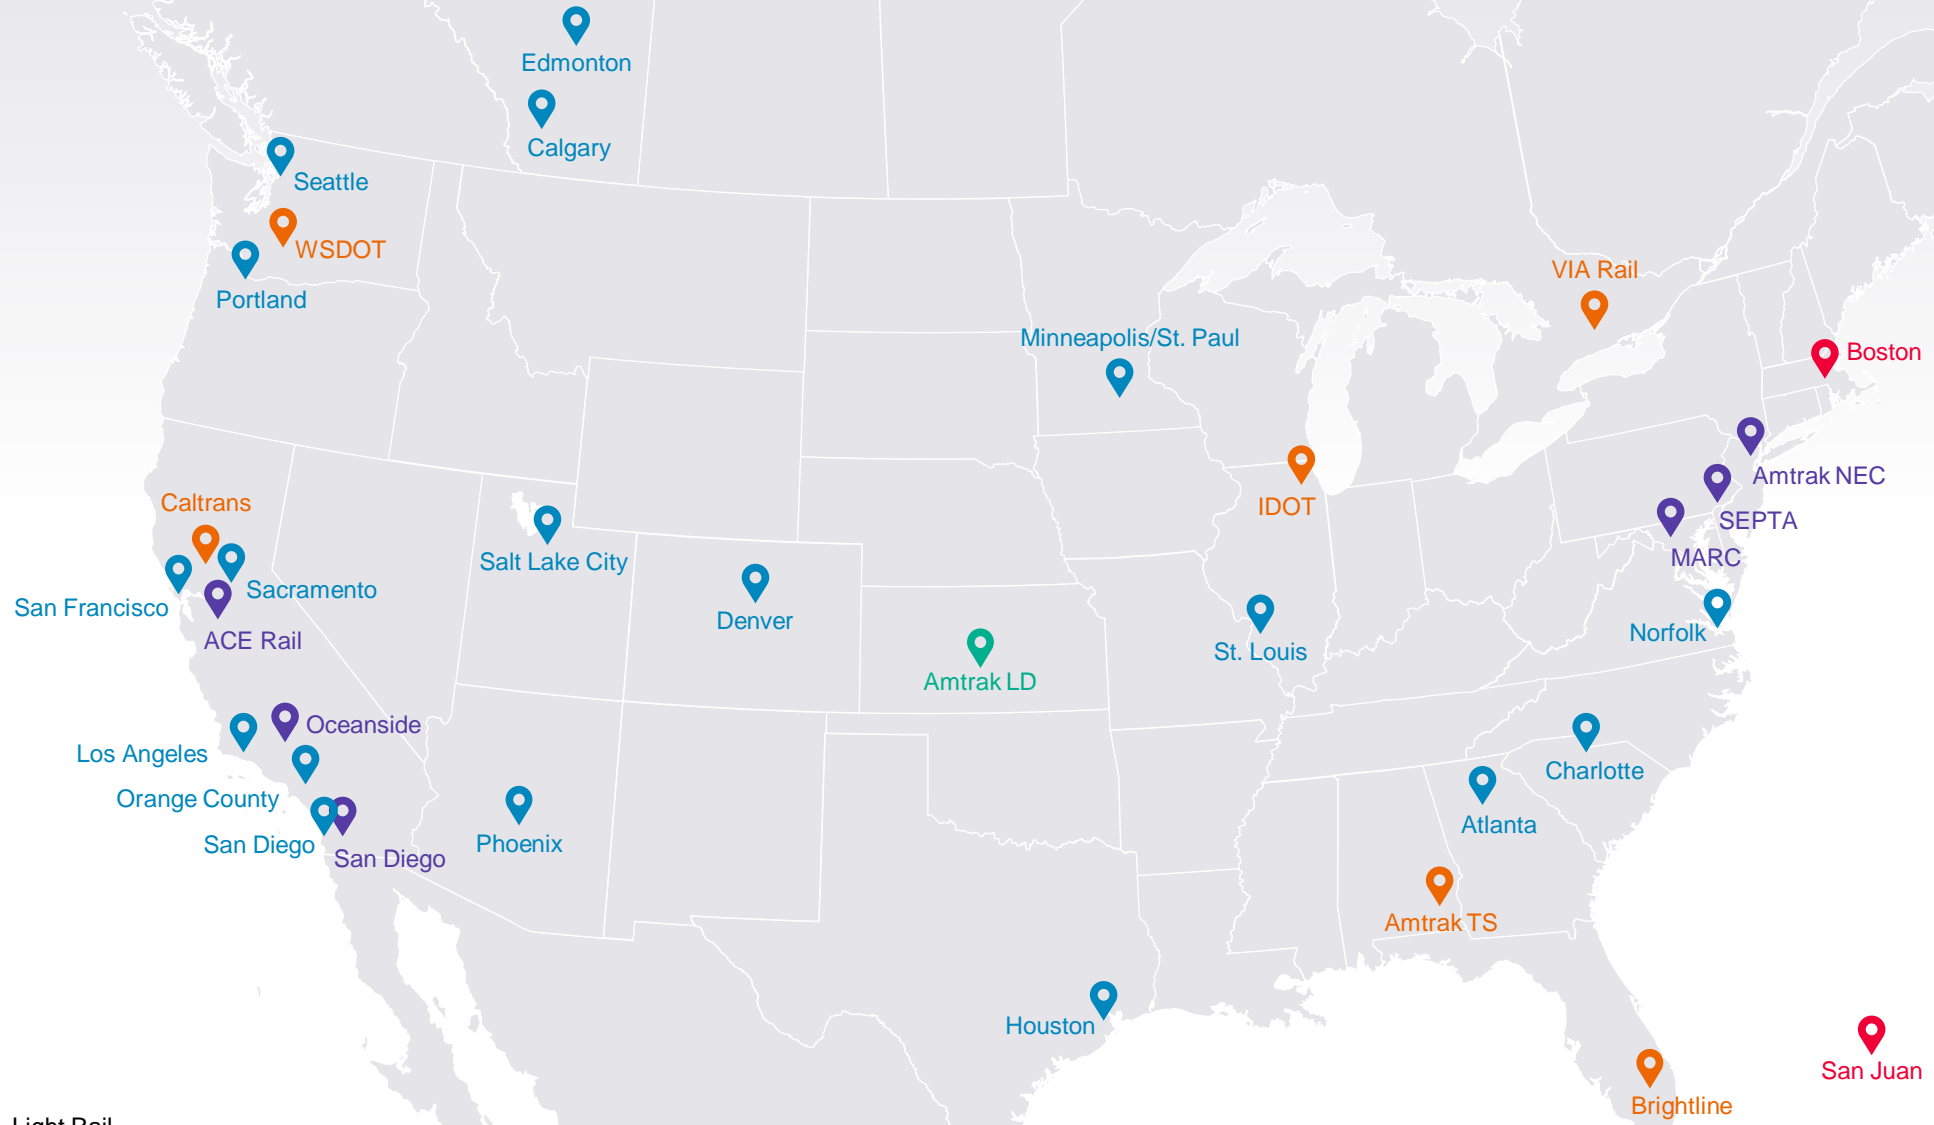

In North America, Siemens Mobility is manufacturing passenger coaches for Amtrak, Caltrans, IDOT, Brightline and VIA Rail.

## Venture Trainsets

The best of both worlds, Siemens Mobility's Venture Trainsets in use across North America combine the **sustainable power** of the Charger locomotive with the **comfort and accessibility** of a passenger coach.

- 📍 Long Distance

## Bringing jobs to California and beyond

Currently, more than **2,500 people** are employed at the **701,295 square-foot** factory, over **60 acres** of land. Our latest expansion for passenger coach and trainset manufacturing will also support a future high-speed rail center of excellence to manufacture train sets for the U.S.

Vehicles **meet or exceed Buy America requirements.**

Robust supply chain includes **nearly 200 California-based suppliers**, with approximately 40 based in Sacramento providing components and parts.
